

# Scapex

Landscapes

## A fresh solution

Scapex Landscapes is a fresh face in the landscaping scene with a world of experience behind us. Dedicated to building amazing landscapes that achieve above and beyond our client's expectations we focus on quality, communication and attention to detail to make sure we get the job done. Our business is based on principles of integrity, respect, hard work and professionalism.

### Our director

Tim Stafford established Scapex Landscapes with over 15 years of experience in the commercial landscape industry behind him. With a degree in Landscape Architecture and Diploma in Horticulture, Tim understands the intricacy of design and the detail in construction that makes a real difference to project outcomes.

Having lead teams on major commercial and premium residential projects Tim understands that communication, above anything, is key to a successful project liaising with clients, consultants, and other stakeholders.

### Our team

On the ground, our team are landscape professionals through and through. Our in-house team is made up of qualified builders and trained horticulturalists whose capabilities include concreting, tiling and paving, stone work, carpentry and formwork as well as plant knowledge second to none.

## Our capabilities

Our core business spans both the commercial and premium residential sectors. Our Open Builders licence enables us to handle all aspects of landscape construction and more.

Our established relationships with Brisbane's leading landscape architects mean Design & Construct projects are easily collaborated and often a successful way to achieve a great project outcome while saving our clients significantly.

#### Hardscapes

- × concrete
- × paving
- × stonework
